

Main points for ppt making

* Intro → what is the project about.
 → It is a website.
 → How it will help users to make their work easy.

* Background theory → + current system

→ This is basically a previous research type things.
 → we can here add about what problems we saw in previous sites and got research about it and got the idea to merge as many ngo's to our site for a easy medium for donor as well as ngo.

* Scope of system:

This system helps a lot to ngo's and other helping centre or some people who served people in this covid crisis and now people are much willingly helping people so our website is worth.

* Requirement gathering techniques used

* Hardware and Software used:

Here we can include how we are using java, html, css to make this website.

Like here we are going to explain ideas of payment portal which uses java in backend and will write that html, css are used for designing front end.

* Flowchart → Makeh ~~one~~ made one is to be included here in a designed manner.
